Indiana
Accredited
Horticulturist

Preparatory
2020 Program

Wednesdays
Jan 8-March 18

Time: 4p-6:30p

Class held upstairs at the
Garden Center

Why IAH?

Want to be more **valuable** at your job?

Tired of **not knowing** about the world of plants?

Whether you are employed in the Green Industry, responsible for maintaining a school campus or an enthusiastic home gardener- the Indiana Accredited Horticulturist (IAH) program has valuable information for you.

Learn accepted horticultural practices for sound, environmentally responsible and aesthetically pleasing landscape management and design.

Promote your company and staff as trained, knowledgeable and certified professionals ready to help your customers achieve the landscape they are picturing.

I A H Program

The INLA (Indiana Nursery and Landscape Association) developed this accredited program to provide broad base horticultural information. It is authored by Purdue and Vincennes professors. This college level information teaches you sustainable landscape practices.

You'll learn...

botany, plant identification, plant care, pruning and lawn management. Pest control, soil science and design concepts- plus more- are covered. You'll then be able to develop site specific landscape management programs for your clients property or your own backyard.

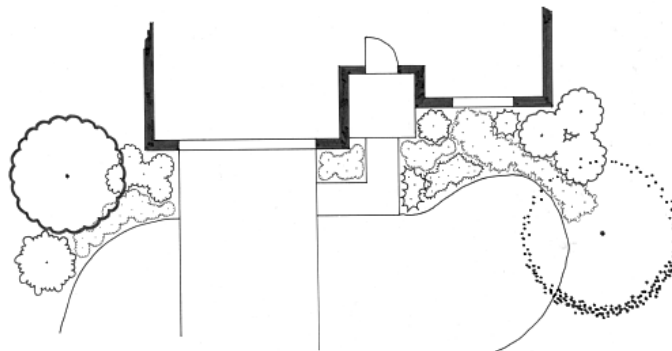

Certification...

is available for Green Industry Professionals and non-professionals upon successful testing.

Exam date: March 19, 2020 at 4:00p-6:00p
