

Chapter 12

1. The plan view refers to an _____ view of a design project.
2. A section view is a “slice” of a component, usually labeled as a _____ drawing.
3. All landscape plans should contain a title block, _____ arrow and must indicate the _____ of the drawing.
4. _____ are critical elevations on a grading or construction plan in reference to a specific point.
5. Plant symbols on a landscape plan should represent the size the plant will reach in several years, but not necessarily fully mature size. T or F
6. Plant symbols should contain a dot or an X showing the exact _____ for placement.
7. Existing topography lines on a grading plan are usually shown as a _____ line.
8. The Plant List on a blueprint calls for 114 Daylilies, but the Planting Plan shows locations for and symbols representing 137 Daylilies. Which takes precedent?
9. Technical Specifications should repeat all information contained in drawings. T or F
10. Perspective drawings represent a 3-D view and are not common on plan drawings. T or F
